

SUNGJAE AHN

danielahn010@khu.ac.kr | [github](#) | [webpage](#)

Education

Kyung Hee University (KHU)

Expected Graduation: Aug. 2027

B.S. in Computer Science and Engineering

GPA : 4.074/4.3 (4.31/4.5)

Research Experience

AI & Robotics Lab (AIR Lab), KHU

Dec. 2025 – Present

Undergraduate Researcher (Advisor: Prof. Hyoseok Hwang)

- Demonstrated that temporal action-smoothness penalties induce spatial smoothness through next-state distributions, enabling more stable deployment of DRL policies in robotics without explicit spatial penalties.
- Exploring self-distillation methods for robust and reliable unlearning in Large Language Models.

Projects

Analyzing Reasoning Diversity in Self-Distillation

Spring 2026

- Leveraged feedback from failed rollouts to encourage diverse reasoning strategies in self-distillation.
- Analyzed distinct roles of KL divergence directions in failed and successful rollouts from an exploration-exploitation perspective.

Deepfake Detection Competition (Held by NFS)

Fall 2025

- Ranked 33 out of 266 teams utilizing Dual Data Alignment for robust cross-domain forgery detection.
- Leveraged Hydra and WandB to manage experimental configurations and ensure research reproducibility.

Activities

SW mentor: CSE 304 Algorithms

Spring, Fall 2025

Curated LeetCode problems for course exercises and supported students through online Q&A.

KHUDA (KHU Data analysis and AI club) 7th

Jan. 2025 - Jul. 2025

Built a legal-domain RAG chatbot over case-law documents using Chroma vector search, Korean sentence embeddings, and MMR-based retrieval.

Signal Intelligence

Feb. 2022 - Nov. 2023

Mandatory Military Service

Skills

AI/ML : PyTorch, Gymnasium, Slurm

English : TOEIC 970

Awards

Academic Excellence Scholarship, KHU

Spring 2024 - Spring 2026
