RESEARCH INTEREST

I believe that achieving Artificial General Intelligence (AGI) requires learning paradigms that enable agents to adapt and improve through [autonomous experience](#), much like **Reinforcement Learning**. In this context, my primary research interest lies in [meta-learning intrinsic reward](#) functions that generalize across diverse environments, enabling agents to rapidly adapt to unseen tasks.

EDUCATION

Kyung Hee University (KHU)

B.S. in Computer Science and Engineering
GPA : 4.05/4.3 (4.29/4.5)

Expected Graduation: Feb. 2027

RESEARCH EXPERIENCE

[AI & Robotics Lab \(AIR Lab\)](#), KHU

Dec. 2025 – Present

Undergraduate Researcher (Advisor: Prof. Hyoseok Hwang)

- Demonstrated that temporal penalties induce spatial smoothness through off-policy transitions, eliminating the need for explicit spatial penalties.
- Investigating self-distillation approach for preserving reasoning diversity of Large Language Models.

PROJECTS

Enhanced [Self-Distillation Policy Optimization](#)

Spring 2026 – Present

- Exploring maximum entropy regularization to expanded Top-K tokens to enhance exploration of the student.

[Deepfake Detection Competition](#) (Held by NFS)

Fall 2025

- Ranked 33 out of 266 teams utilizing Dual Data Alignment for robust cross-domain forgery detection.
- Leveraged Hydra and WandB to manage experimental configurations and ensure research reproducibility.

ACTIVITIES

CSE 304 Algorithms

Spring, Fall 2025

SW-mentor at KHU

KHUDA (KHU Data analysis and AI club) 7th

Jan. 2025 - Jul. 2025

NLP Track, Developed RAG-based Chatbot

Signal Intelligence

Feb. 2022 - Nov. 2023

Mandatory Military Service

SKILLS

AI/ML : PyTorch, Gymnasium, Slurm

English : TOEIC 970

AWARDS

Academic Excellence Scholarship, KHU

Fall 2025

Academic Excellence Scholarship, KHU

Spring 2025

Academic Excellence Scholarship, KHU

Fall 2024

Academic Excellence Scholarship, KHU

Spring 2024
